

Fuel Usage

Fuel cannot be stored in the boat yard at CTD. They accept that there will be fuel in a boat but will not permit loose fuel in a carry container anywhere on the premises.

The race group bring the fuel to top up the on-board tank with them. Other users will need to do the same.

There is a 12 litre tank under the seat and there was a carry can in the boat last time I was there.

Whilst emailing I remind you about emergency paddles.
